Question 04:

Pseudocode:

START

DECLARE q : INTEGER

DECLARE $p, d, t, s, a, \text{Final}$: REAL

OUTPUT "Please enter the quantity"

INPUT q

OUTPUT "Please enter the price per item"

INPUT p

OUTPUT "Please enter the discount percentage"

INPUT d

OUTPUT "Please enter the tax percentage"

INPUT t

IF $q < 0$ OR $p < 0$ OR $d < 0$ OR $t < 0$ THEN

OUTPUT "Error! Invalid values entered..."

ELSE

$s \leftarrow q * p$

$a \leftarrow s - (s * d) / 100$

$\text{Final} \leftarrow a + (a * t) / 100$

OUTPUT "Quantity: " q

OUTPUT "Price per item: " p

OUTPUT "Subtotal: " s

OUTPUT "Discounted Amount: " a

OUTPUT "Tax Percentage: " t "%"

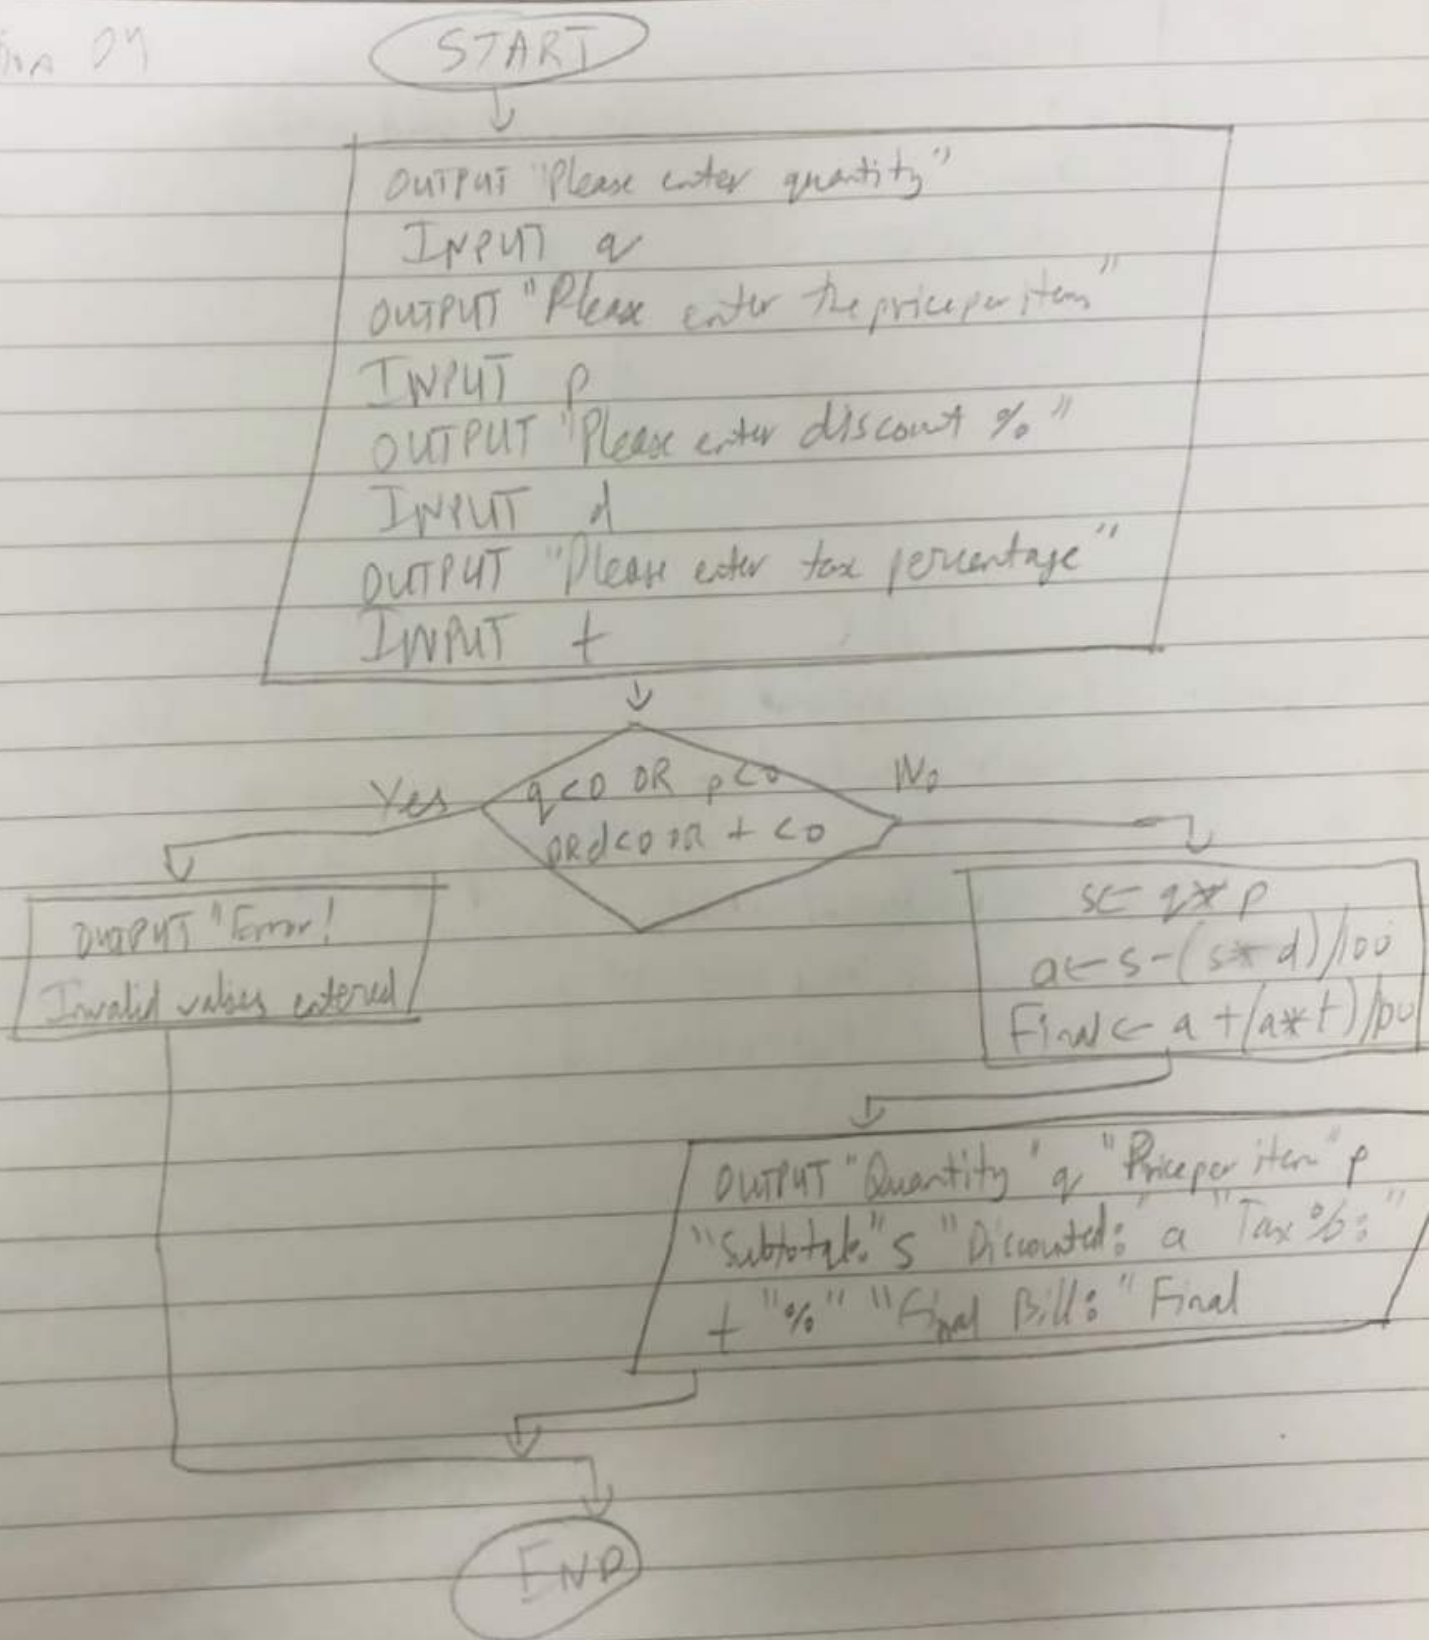

OUTPUT "Final Bill: " Final

ENDIF

END

Date _____

Question 29

Date _____

IPD

INPUT	Process	OUTPUT
- q	(1) Data entry	- "Invalid values"
- p	(2) Validation	- q
- d	(3) Condition statements	- p
- t		- s
		- a
		- t
		- Final.

PAC

Data given	Processing required	Required Results.
- q	(1) Receive variable from users	- Error message
- p	(2) Perform logical checks	- q, p, a, s, t, Final
- d	(3) Compute basic sub total	
- t	(4) OUTPUT Final value
